PAPER

Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary

Application No.

10/505,281

Applicant(s)

NICHOLAS, DOLLY

Examiner

Peter A. Hruskoci

Art Unit

1724

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 07 June 2007.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1,2,5-10,12-16 and 18-20 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1, 2, 5-10, 12-16, and 18-20 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
- ☐ Certified copies of the priority documents have been received.
 - ☐ Certified copies of the priority documents have been received in Application No. _____.
 - ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Claims 1, 2, 5-10, 12-16, and 18-20 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claims contain subject matter, which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. It is submitted that claims 1 and 15 recite the terms "oxidizing or reducing agent" "oxidizing or reducing agent", respectively, and the instant specification fails to include a description of specific oxidizing or reducing agents that could be utilized in the instant method. It is suggested that applicant provide evidence of which chemicals are used to form the "HLC2003, HPC2003, HGC2003, and HSC2003" compositions disclosed on page 8 of the instant specification, and include these chemicals in the specification and claims.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1, 2, 5-10, 12-16, and 18-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Vitalis et al. 3,756,959 in view of Fullinwider et al. 4,014,801. Vitalis et al. disclose (see col. 3 line 44 through col. 7 line 65, and Example 1) a method for treating an emulsion or effluent containing suspended solids and soluble salts substantially as claimed. The claims differ from Vitalis et al. by reciting the injection of an oxidizing or reducing agent into the emulsion or effluent. Fullinwider et al. disclose (see col. 1 line 65 through col. 3 line 56) that it is known in the art to add oxidizing or reducing agents to aid in separating aqueous and hydrocarbon phases in an emulsion including oil, polyacrylamide, and demulsifying agent. It is

Art Unit: 1724

submitted that the temperature and agents utilized in the combination of Vitalis et al. and Fullinwider et al. would appear to cause reduced interfacial tension, chained scission and change in molecular weight of the oil molecules, enhance viscosity of a saleable product, and a reduction in BOD and COD of the aqueous phase as in the instant method. It would have been obvious to one skilled in the art to modify the method of Vitalis et al. by injecting the recited oxidizing or reducing agent in view of the teachings of Fullinwider et al., to aid in separating an aqueous phase or a clean effluent. With regard to claims 5 and 8, it is submitted that the surfactants utilized in Vitalis et al. appear to include the recited solubilizer, and hydrophobic and hydrophilic chemicals. The specific testing utilized, addition of the oxidizing/reducing agent to the aqueous phase to further form a clean effluent, and the specific clean effluent or water produced, would have been an obvious matter of process optimization to one skilled in the art, depending on the specific emulsion or effluent treated and results desired, absent a sufficient showing of unexpected results.

Applicant argues that the disclosure of the commercial trade names of four chemicals which were known to work in the claimed method is sufficient disclosure for one of skill in the art to be able to practice the claimed method. It is unclear how the composition HSC2003 is utilized in the instant method. This composition does not appear to include an oxidizing and reducing agent, and includes a distillate and terpene hydrocarbons, which would appear to increase the COD of the aqueous phase. Furthermore, applicant should provide a copy of the material data sheet to support the amendment to the specification.

Applicant argues that Vitalis et al. does not teach or suggest that a temperature is maintained for a predetermined period of time, and that such a temperature change, in

Art Unit: 1724

combination with the injected agent, causes chained scission in the oil molecules, resulting in an enhanced final viscosity of a saleable product, as in the instant method. It is submitted that the temperature and agents utilized in the combination of Vitalis et al. and Fullinwider et al. would appear to cause chained scission and change in molecular weight of the oil molecules, and enhance viscosity of a saleable product as in the instant method. Furthermore, applicant has not presented sufficient factual comparative evidence with the teachings of Vitalis et al. and Fullinwider et al., to support the above argument.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Peter A. Hruskoci whose telephone number is (571) 272-1160. The examiner can normally be reached on Monday through Friday from 8:00AM-5:00PM.

Art Unit: 1724

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Duane Smith can be reached on (571) 272-1166. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
